Centre of Excellence for Biometrics

The CROS NT Goup is an international Contract Research Organization (CRO) specialized in clinical data services. With over 800 studies completed, CROS NT has remained focused on biometrics as more and more clinical Sponsors are seeing the value in centralizing their data. With offices in Italy, Germany and the UK, CROS NT has retained 100% of its customers due to advanced internal governance of projects and client relationships built on trust.

A Complete Biometrics Package

LIFE SCIENCE TECHNOLOGIES **CLINICAL DATA MANAGEMENT** **BIOSTATISTICS** **PHARMACOVIGILANCE** **MEDICAL COMMUNICATIONS** **CONSULTANCY**

We have both the skilled personnel and the right technologies to collect, analyze and report data. Paradoxically we are able to reduce costs while improving quality. Costs can be reduced by up to 40%. We achieve this through standardization, technology and re-use of existing programming. Services include:

Statistical Methodology and SAS Programming: SAP, Blind Review, Randomization, Sample Size Calculations, Integrated Summaries of Safety and Efficacy, Analysis & Reporting, CDISC Mapping
Global Data Management Solutions: CRF Design and Tracking, Query Management, Data Validation, Medical Coding
Pharmacovigilance: Adverse Event Reporting and Signal Detection
Medical Writing: Clinical Study Reports, Protocols, Investigator Brochures, Common Technical Documents
Consultancy: Statistical review of protocols, support for DSMBs and at meetings with regulators

Life Science Technology

ARITHMOS

Established in 2010 by CROS NT, ARITHMOS provides innovative IT solutions to optimize data collection, integration and reporting across all phases of the clinical trial process. The team provides:

Life Science Technologies: EDC, ePRO, Pharmacovigilance, CTMS, eLearning
Services: Computer System Validation, Hosting, Data Integration, Data Visualization & Reporting, HelpDesk
ArithmosCentrum: a comprehensive business management tool, which manages the information flow between sales, project management, finance and resourcing. A ˝must-have˝ for CROs.

Why CROS NT Group?

Being experts in biometrics and technology, we can collect, integrate and analyze data from various sources and become a Sponsor's hub for easy access to their data. We use processes and technology that ensure excellent planning, management, reporting and traceability of projects.
